Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A method of colour correcting a sensed image before printing by a hand held camera system, said camera system including:

an image sensor device for sensing an image;

a processing means for processing said sensed image; and

a printing system including a printhead for printing out said sensed image; wherein the method of colour correcting [[a]] said sensed image before printing comprises:

<u>a first user utilizing</u> said image sensor device to sense a first image <u>of a first</u> scene;

processing said first image to determine colour characteristics of said first image;

said same first user utilizing said image sensor device to sense a second image of said same first scene, in rapid succession to said first image, wherein said second image is substantially identical to said first image;

applying colour correction to said second image based on the determined colour characteristics of said first image; and printing out said second image by said printhead.

- 2. (previously presented) A method as claimed in claim 1 wherein said second image is sensed within 1 second of said first image.
- 3. (original) A method as claimed in claim 1 wherein said processing step includes examining the intensity characteristics of said first image.
- 4. (original) A method as claimed in claim 1 wherein said processing step includes determining a maximum and minimum intensity of said first image and utilizing said intensities to rescale the intensities of said second image.
